CASE STUDY

Pacifica Development Escape Homes

CPS provided perimeter scaffolding and incidental crane services for 40 homes being built within the Pacifica Development in Casuarina.

Project Details

Project Type: Ongoing

Project Value: 40 houses at an average value of \$7K

Service: Perimeter scaffolding & incidental crane services

Variance Dollar Value: Nil to date

Location: Casuarina NSW

Hours: 2560 (budget)

Summary of Project

The Pacifica development is a stunning collection of Seaside Village beach homes. Situated in the centre of Seaside Village, the release of 46 freehold lots with architectural plans for three and four bedroom residences represent fantastic value. We supplied scaffolding and crane services to assist Escape Homes in lifting prefabricated timber frames onto the level 1 floor plate, saving them time and money.

Our Solution

We saved our client \$300 - \$400 per house by scheduling our scaffolding deliveries in line with their requirement to lift prefabricated timber frames onto the level 1 floor plate. Our delivery truck lifted the frames up on their behalf removing the need for the separate hire of a mobile crane at a minimum cost of \$500.00

The Value Addition of CPS

Commercial Project Services is a leading supplier of scaffolding services to construction, maintenance and infrastructure projects in South East QLD. We are well placed to provide tailored scaffold solutions to projects of any size through the provision of skilled labour resources complemented with scaffold material hire and scaffold design services. CPS is unequivocally committed to ensuring our employees, fellow contractors, clients, the general public and the environment in which we work are injury and incident free every day.
